### DETAILED ACTION

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Abstract:

Delete the abstract and insert the following:

--A powdered composition for food and drink comprising powdered soy protein isolate, anthocyanin and an organic acid composition is provided which is dissolved or suspended in water, milk, to provide a beverage which has a vivid reddish purple color characteristic of anthocyanin and which the anthocyanin is stabilized to maintain its various functions.--

2. The following is an examiner's statement of reasons for allowance:

The invention relates to a powdered composition which can be added to food or drinks comprising soy protein isolate, an anthocyanin-containing powder and an organic acid the composition is dissolved or suspended in water or milk which develops a vivid reddish purple color characteristic of the anthocyanin, the composition provides a stabilized anthocyanin containing food or drink. The powdered composition containing soy protein isolate, an anthocyanin containing powder and an organic acid has not been taught either singularly or in combination by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Forusz et al. teach a method of administering a beverage composition for human consumption, which includes solubilized components of a calcium compound, organic acid, a soy isoflavones, inulin and a stabilizing agent. The composition can include flavors, which include orange, peach, cranberry, tangerine, etc. The beverage can include other vitamins, minerals and can be clear or translucent in color or can include F&DC colorants. The composition can also include sweeteners, and organic acids. There is no teaching in Forusz et al. to include an anthocyanin-containing powdered to the beverage, nor does Forusz et al. specifically teach providing a powdered composition which is readily dispersible or suspendable in water or milk comprising, soy protein isolate, an anthocyanin-containing powder and an organic acid. Hirschberg teaches method of infusing phytochemicals, nutraceuticals and other compositions into food products. The infused food products when consumed are helpful in alleviating dietary insufficiency and can be used for treating diseases. Hirschberg does not teach providing a powdered composition, which is readily dispersible or suspendable in water or milk comprising, soy protein isolate, an anthocyanin-containing powder and an organic acid. US2003/0104108 teach providing a ready to drink, shelf stable refreshing juice/soy beverage. US2003/0104108 does not teach or suggest

providing a powdered composition, which is readily dispersible or suspendable in water or milk comprising, soy protein, isolate, an anthocyanin-containing powder and an organic acid. US2003/0104108 teaches providing phytochemicals from fruit and vegetable juices to provide a ready to drink beverage. The juice and soy beverages described includes soy protein isolate, citric acid, water, vitamins, masking flavors, beta carotene, can contain cranberry juice concentrate but does not teach providing a powdered drink composition which is suspendable or dispersible in water or milk which contains an anthocyanin-containing powder.
